The development of the child as a whole is paramount and we recognize that different students are motivated by different experiences. As students progress through DIDACTICS, they are encouraged to take advantage of the many opportunities at Didactics.

A Value-Driven Education

We know that academic achievement is important because academic qualifications are the passport to accessing a better life and good university options, but we believe a value-driven education is equally vital. At DIDACTICS we help students to develop their character, values, talents, and personal leadership to achieve their full potential as global citizens and leaders of the future. Students learn to celebrate diversity with a spirit of understanding and tolerance, to develop a positive regard and awareness of other people and cultures.

Focus on Extra Curricular Activities

DIDACTICS emphasizes physical education programs and outdoor activities. The intended purpose of these activities is to teach and endorse long-term physical and mental health. Even though DIDACTICS is a digital school, it still offers sports day and field trips. The school offers a range of sports activities from traditional competitive intramural to club sports activities to meet the diverse needs of students.

Students are encouraged to engage in a reasoned debate, question assumptions, and strengthen their voices. We aim to achieve this goal by offering a wide range of extracurricular activities such as essay writing, debate competitions, mural projects, and general knowledge-based quizzes, among many others. These activities enhance students' experience and help to explore interests. We aim to provide a balanced educational program promoting both theory and practical implications. We organize various educational trips to give hands-on industry experience to our students. The outdoor educational programs boost our students learning skills and develop a supportive learning community.
